INDEX

Current Documents in the Technical Guidance Compendium

VA30000.00.000 – General Information

VA30000.09.002 - Lead-based Paint under the Voluntary Action Program
VA30000.14.003 - VAP Environmental Covenants: Avoiding the Unauthorized Practice of Law
VA30000.19.001 - Radiological Materials under the Voluntary Action Program
VA30000.19.002 – Asbestos Remediation under the Voluntary Action Program
VA30000.19.003 - Real Property Tax Exemptions under the Voluntary Action Program
VA30000.19.004 – Pesticide Evaluation in the Voluntary Action Program

VA30001.00.000 – Definitions Under the VAP

VA30001.19.001 – VAP Hazardous Substance Definition Scope
VA30001.19.002 – Restricted Residential Land Use in the VAP
VA30001.19.003– Evaluating Recreational Activities in the VAP

VA30002.00.000 – Eligibility for Participation in the VAP

VA30002.09.011 - VAP Eligibility of Hazardous Waste Facilities Subject to Closure, Corrective Action, or Federal or State Enforcement
VA30002.19.001 - Foundry Sands and Voluntary Action Program (VAP) Eligibility
VA30002.19.002 - Consolidation of Hazardous Contaminated Soils Regulated Under RCRA at VAP Sites
VA30002.19.003 - Media and Debris Contaminated By Hazardous Waste Regulated Under RCRA at VAP Sites
VA30002.19.004 - Generator Closure
VA30002.19.005 - Hazardous Waste Management Units Subject to Closure
VA30002.19.006 - VAP Eligibility of Properties with Petroleum UST Systems Removed or Properly Closed-In-Place Prior to December 22, 1988
VA30002.19.007 - VAP Eligibility of Unlicensed, Unpermitted Solid Waste Disposal Facilities

VA30003.00.000 – VAP Fees

VA30004.00.000 – Certified Laboratories

VA30004.19.001 - Issues Related to Analysis of COCs with Special Laboratory Considerations

(a link to archived TGCs can be found at the end of this index)

VA30005.00.000 – Certified Professionals

VA30005.09.001 - Issuance and Submission of an Addendum to an NFA Letter Issued by Another Certified Professional
VA30005.19.001 - Complying With Certified Professional Initial Training Requirements
VA30005.19.002 - Complying With Continuing Education Requirements for Certified Professionals

VA30006.00.000 – Phase I Property Assessments for the VAP

VA30006.19.001- Use of Historical Analytical Data During a Phase I Property Assessment to Determine Chemicals of Concern for a Phase II Property Assessment
VA30006.19.002 - Requesting Records from Ohio EPA for Properties Undertaking a Voluntary Action
VA30006.19.003 -- Differences Between Phase I Assessment Requirements for the VAP and ASTM E1527-05 (All Appropriate Inquiry)
VA30006.19.004 - Amending the Phase I Property Assessment If 180 Days Has Elapsed

VA30007.00.000 – Phase II Property Assessments

VA30007.14.006 - Universe of Chemicals of Concern for a Protection of Ground Water Demonstration

VA30007.14.007 - Separation Distance Between Source Area(s) and Ground Water
VA30007.14.008 - Appropriate SESOIL Version to Use for Voluntary Actions

VA30007.14.009 - Use of SESOIL for Modeling the Fate and Transport of Metals
VA30007.14.012 - Guidance for Computing the 95% UCL of an Environmental Data Set
VA30007.14.013 - Use of Direct Push for Ground Water Sampling

VA30007.14.014 - Acceptable Ground Water Recharge Rates for SESOIL Modeling
VA30007.14.015 - Use of Soil Partitioning Coefficient to Evaluate Leaching

VA30007.14.016 - Use of RBCA Tool Kit ® and SAM to Evaluate Leaching

VA30007.14.017 - Clarification of Whether the Protection of Ground Water Requirement Applies to Each Chemical of Concern Separately
VA30007.14.022 - Sampling and Analysis of Fraction Organic Carbon (f_{oc}) in Soils

(a link to archived TGCs can be found at the end of this index)

VA30007.19.001 - Methods for Confirmation of Non-Certified Laboratory Datasets and Background Calculation
VA30007.19.002 – Use of Multi-Increment (MI) Sampling in the VAP

VA30007.19.003 - Determining Maximum Yield or Average Annual Yield

VA30007.19.004 - Biasing Yield or Hydraulic Conductivity Testing to Areas of Highest Yield or Hydraulic Conductivity
VA30007.19.005 - Appropriate Application of Yield and Hydraulic Conductivity Data
VA30007.19.006 - Determining Ground Water Yield When Well Intakes Are Less Than 80% of the Thickness of a Saturated Zone
VA30007.19.007 - Use of Literature Degradation Rates in a Property-Specific Fate and Transport Modeling Evaluation
VA30007.19.008 - Identification of Outliers for Background Calculation

VA30007.19.010 - Ground Water Sample Filtration

VA30007.19.011 - Difference Between Identified Areas and Exposure Units in the VAP
VA30007.19.012 - Applicability of U.S. EPA's Soil Screening Levels via the Leaching Pathway
VA30007.19.013 - What to do When There is No Laboratory Certified for the Analysis of a Specific Chemical of Concern of Analytical Method
VA30007.19.014 - Use of Direct Push Technology in lieu of Monitoring Wells for Ground Water Classification
VA30007.19.020 - Characterization of Soil for Placement onto a VAP Property
VA30007.19.021 - Soil and Sediment Sampling: Wet Weight versus Dry Weight
VA30007.19.022 - Use of Native Soils as Background, When Present Beneath Fill Materials

VA30008.00.000 – Generic Numerical Standards

VA30008.19.001 - Applying Generic Petroleum Standards Under the Voluntary Action Program
VA30008.19.002 - How to Conduct Multiple Chemical Adjustments Under the Voluntary Action Program
VA30008.19.003 - Demonstrating Compliance with Generic Standards for Surface Water
VA30008.19.004 - Cumulative Adjustment for Lead, TPH, and Leach-Based Soil Values
VA30008.19.005 - Applicability of Commercial/Industrial Generic Numerical Standards to Child Receptors

VA30008.19.006 - Applicability of Generic Numerical Direct-Contact Soil Standards to Agricultural Land Use
VA30008.19.007 - Unrestricted Potable Use Standards (UPUS) for Polychlorinated Biphenyls (PCBs)

VA30009.00.000 – Property-Specific Risk Assessment Procedures

VA30009.09.004 - Demonstration of Compliance with Applicable Standards and Response Requirements for Sediments When Contamination Is Attributable Entirely to Off-property Sources
VA30009.17.002 - Property-specific standards using updated exposure factors and toxicity information
VA30009.19.001 - Uncertainty Analysis Under the VAP

VA30009.19.003 – Sampling Considerations When Determining Background for Sediments
VA30009.19.004 - Supplemental Values for Chemicals of Concern without Generic Numerical Standards
VA30009.20.001 - Evaluating Exposure to Ground Water or Soil Gas During Construction Activities
VA30009.20.002 - Evaluation and Assessment of Persistent, Bioaccumulative and Toxic Chemicals of Concern in the Voluntary Action Program

VA30010.00.000 – Ground Water Classification and Response Requirements

VA30010.19.001 - Determination of Wells Used for Potable Purposes
VA30010.19.002 - Urban Setting Designation Notification Letter: Purpose of USD and Standards
VA30010.19.003 - Capture Zone of a Well
VA30010.19.004 - Classification of Class B Ground Water by Comparison to Another Ground Water Zone
VA30010.19.005 - When to Demonstrate the Protection of Ground Water Zones Meeting Unrestricted Potable Use Standards
VA30010.19.006 - Determination That Not Less Than 90% of Parcels Are Connected to a Community Water System for an Urban Setting Designation

VA30011.00.000 – O&M/Remediation

VA30011.14.004 - Post-Remedy Verification Ground Water Monitoring for VAP Projects

(a link to archived TGCs can be found at the end of this index)

VA30011.16.001 - Proper Abandonment of Monitoring Wells
VA30011.19.001 - Expanded Scope of Risk Mitigation measures to Include in a Risk Mitigation Plan
VA30011.19.002 - Implementing Fencing Restrictions as Remedial Activities
VA30011.19.003 - Injection Wells Used for Remedial Purposes
VA30011.19.004 - Hazardous Waste Reporting Requirements for the Off-Site Shipment of Hazardous Waste at VAP Properties

VA30012.00.000 – Variances

VA30013.00.000 – Content and Scope of NFA Letters

VA30013.19.001 - Issuing NFA Letters for Non-contiguous Parcels
VA30013.19.002 - Multiple Land Uses Under One NFA Letter

VA30014.00.000 – Audits of NFA Letters
