Subject: draft well-site GPs comment

Hello Cheryl

Not sure if this is what is intended or not, but I think each of the emissions units at these sites should get their own GP. This way if only one e.u. is replaced we can give them a new GP just for that unit. Also, some sites may not have all e.u.'s listed and some of the separate e.u.'s we may be able to use individually at other sites such as natural gas compressor stations (dehydration systems). Just my 2 cents.

Thanks,
Tim
