

## **RULE SYNOPSIS**

Rescission of Ohio Administrative Code (OAC) Chapter 3745-72  
(Low Reid Vapor Pressure Fuel Requirements)

The Ohio EPA Division of Air Pollution Control (DAPC) is planning to rescind the rules contained in Ohio Administrative Code (OAC) Chapter 3745-72 which establish the low Reid vapor pressure (RVP) fuel requirements. These rules are no longer necessary, as U.S. EPA approved the removal of the low RVP fuel requirements in the Cincinnati and Dayton areas on April 7, 2017 [82 FR 16932].
