

3750-30-25

Identification of hazardous chemicals.

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (YY) of rule 3750-1-01 of the Administrative Code titled "Referenced materials."]

(A) A chemical is a hazardous chemical if such chemical meets the definition under paragraph (U) of rule 3750-1-01 of the Administrative Code and falls into one of the ~~five health~~two hazard categories listed below:

- ~~(1) "Immediate (acute) health hazard" including highly toxic, toxic, irritant, sensitizer, corrosive, as defined under Title 29 C.F.R. 1910.1200 and other hazardous chemicals that cause an adverse effect to target organ and which effect usually occurs rapidly as a result of short term exposure and is of short duration;~~
- ~~(2) "Delayed (chronic) health hazard" including carcinogens, as defined under Title 29 C.F.R. 1910.1200 and other hazardous chemicals that cause an adverse effect to a target organ and which effect generally occurs as a result of long term exposure and is of long duration;~~
- ~~(3) "Fire hazard" including flammable, combustible liquid, pyrophoric and oxidizer, as defined under Title 29 C.F.R. 1910.1200;~~
- ~~(4) "Sudden release of pressure" including explosive and compressed gas, as defined under Title 29 C.F.R. 1910.1200;~~
- ~~(5) "Reactive" including unstable reactive, organic peroxide, and water reactive, as defined under Title 29 C.F.R. 1910.1200.~~

(1) "Health hazard" means a chemical which poses one of the following hazardous effects: Carcinogenicity; acute toxicity (any route of exposure); aspiration hazard; reproductive toxicity; germ cell mutagenicity; skin corrosion or irritation; respiratory or skin sensitization; serious eye damage or eye irritation; specific target organ toxicity (single or repeated exposure); simple asphyxiant; and hazard not otherwise classified (HNOC).

(2) "Physical hazard" means a chemical which poses one of the following hazardous effects: Flammable (gases, aerosols, liquids or solids); gas under pressure; explosive; self-heating; pyrophoric (liquid or solid); pyrophoric gas; oxidizer (liquid, solid or gas); organic peroxide; self-reactive; in contact with water emits flammable gas; combustible dust; corrosive to metal; and hazard not otherwise classified (HNOC).

(B) A chemical is a hazardous chemical if such chemical is identified below and adopted by the commission pursuant to divisions (B)(4) and (C)(5) of section 3750.02 of the
