

Division of Drinking and Ground Waters

August 12, 2013

Hello Everyone,

The Ohio State University is conducting a Job Analysis Workshop and has requested that we assist them in putting together a panel of operators. We are looking to update our Class 1 Wastewater Treatment Operator Job Analysis. If you are a certified wastewater operator who is responsible for overseeing a Class 1 system, then we are interested in having you volunteer to help us in this endeavor. OSU has indicated that they would need a panel on September 19 and 20. Participants in the panel will be given 12.75 contact hours with the designation "OM". If you are interested in participating in the panel or have questions, please email me at andrew.barienbrock@epa.state.oh.us or give me a call at 614-728-1216.

Thanks,

Andy
