

Call For Presentations - OH Brownfield Conference 2014

The Ohio Brownfield Conference Committee has opened their call for presentations for our conference which will be held on April 9th and 10th, 2014. This conference attracts attendees from a number of different disciplines such as environmental consultants; economic development, brownfield and other municipal officials; state government officials; developers; environmental attorneys and cleanup contractors. The level of brownfield knowledge ranges from beginner to advanced and the presentations need to range from highly technical to more general information. We welcome your interest in submitting a presentation for this upcoming conference.

Submittals for this Call for Presentations must be received no later than the close of business on November 15, 2013. Presentations submitted after that date WILL NOT be considered for the Conference.

You will be notified no later than mid January 2014 if your presentation will be part of the Conference agenda. If your presentation is selected, you will be expected to e-mail us your Powerpoint (or other presentation materials) no later than March 21, 2014. Failure to provide your presentation materials by March 21 will result in the Committee pulling the presentation from the agenda.

As much as we would like to compensate all presenters for their efforts in helping us make this conference a success, we are unable to provide either free registration or any fees for your presentation. This is due to the strict ethical guidelines we must adhere to as an Agency representing the State of Ohio. Presenters will be able to register for the conference at the reduced government rate.

PDHU Notice for those VAP Certified Professionals submitting presentations: if your presentation is accepted and you present at the conference, you will be awarded 8 PDHUs for your presentation and preparation efforts.

Call For Presentations - OH Brownfield Conference 2014

1. Presentation Title:

2. Presentation is geared toward audience with:

- Basic understanding of brownfields
- Intermediate understanding of brownfields
