Purpose and Intent

The Certified Erosion Sediment and Storm Water Inspector (CESSWI) program and certification was developed by EnviroCert International, Inc. The purpose of the CESSWI, Inc. program is to certify individuals who are technically and ethically qualified to provide inspections services for compliance with Federal (EPA NPDES and others), State and Local regulations. The CESSWI knowledge of Federal, State and Local requirements will allow CESSWIs to best inspect and advise permit holders of the necessary practices and proper techniques to apply planned erosion and sediment control and storm water BMPs. CESSWIs have the necessary knowledge to recognize if a permitted site is in compliance with Federal (NPDES), State and Local requirements.

****Application for Exam**

Professionals who wish to become Certified must submit an application and be approved by CESSWI, Inc. **BEFORE** they can take the exam. It is recommended that the attendee apply at least 45 days before the exam date. For more information on the exam please contact:

CESSWI, Inc.
49 State Street
Marion, NC 28752-4020
Phone: (828) 655-1600
