

Water Quality Testing Kits

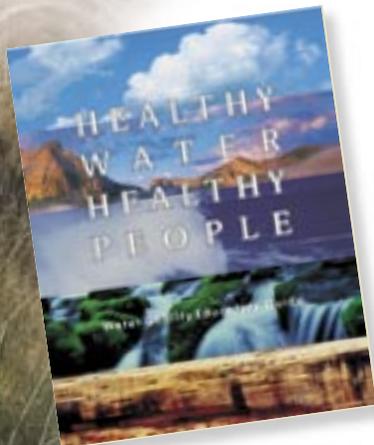

NEW!

PASCO Water Quality Testing Kits featuring PASPORT Probeware.

Project WET's water quality education program, Healthy Water, Healthy People, offers innovative, teacher-tested materials designed to make complex water quality concepts understandable and relevant for both teachers and students. Healthy Water, Healthy People curriculum materials were developed by teachers working with water quality experts, and appeal to beginning and advanced educators alike.

PASCO is pleased to work with Project WET in offering probeware kits for the Healthy Water, Healthy People curriculum. Each kit provides PASCO's advanced probeware technology to support real-time data collection and monitoring in the field. With PASCO's Xplorer Datalogger, students can collect and view water quality measurements instantly, plus store data for later use. Additional reporting and analysis capabilities can be conducted when students return to the classroom and upload data to computers.

Water Education for Teachers
INTERNATIONAL

Standard Kit PS-2695

The PASCO kits at right include the checked items below:

Xplorer Datalogger (PS-2000) -- Connect a probe and collect data outdoors away from a computer or laptop using a LED display; or connected directly to a computer or laptop indoors.

HWHP Water Quality Educators Guide (SE-7398) -- This 250-page activity guide is for educators and contains 25 original activities that link priority water quality topics to real-life experiences of educators and students.

HWHP Testing Kit Manual (SE-7399) -- This 100-page technical reference manual is an excellent companion text that supports all of the Healthy Water, Healthy People publications and materials.

PASPORT Temperature Sensor (PS-2125) -- Measure the temperature of air, water or soil.

PASPORT pH Sensor (PS-2102) -- Measure the pH of water or other solutions.

PASPORT Conductivity Sensor (PS-2116) -- Measure the conductivity of aqueous solutions.

PASPORT Turbidity Sensor (PS-2122) -- Measure the turbidity of aqueous solutions.

PASPORT Dissolved Oxygen Sensor (PS-2108) -- Measure the concentration of oxygen dissolved in a solution or body of water.

PASPORT Flow Rate/Temperature Sensor (PS-2130) -- Measure the rate of movement and temperature of streams, rivers and other flowing systems.

DataStudio Lite -- Free basic version of DataStudio, the award-winning software to view, manipulate, display and analyze collected data on computers.
