**RE: Countywide Landfill, Stark County  
Waste Placement Request in Remediation Unit**

Dear Mr. Darnell:

On March 18, 2010, Ohio Environmental Protection Agency (Ohio EPA) received a request (via e-mail) titled "Countywide Remediation Unit, Director's Final Findings and Orders, Dated September 30, 2009, Request to Place Waste for Establishment of Grade." The request was submitted in accordance with Part V, Section 1 of the Director's Final Findings and Orders dated September 30, 2009.

The submittal requests to dispose of approximately 250 cubic yards of waste generated during gas extraction well drilling within the Remediation Unit. The area proposed for waste placement is within the northeast portion of Cell 3 and portions of the adjoining Cell 2 area, also known as the former solidification area plateau. The waste will help to promote positive surface water drainage.

After review of the submitted information, Ohio EPA hereby approves Countywide's request to dispose of the 250 cubic yards of waste within the limits depicted in the site plan as submitted as part of the request dated March 18, 2010. During disposal activities, Countywide must take all necessary actions to avoid any odor issues and all temporary cap (FML) that is removed or damaged must be replaced in accordance with the approved Operations, Monitoring and Maintenance Manual. Also, it should be noted that the payment of \$2.00/ton has been previously paid to the Community Benefit Fund.

If you have any questions, feel free to contact Karen Naples at 330-963-1244.

Sincerely,

Pamela S. Allen, Chief  
Division of Solid and Infectious Waste Management
