

SENATE BILL 265 OF THE 126th GENERAL ASSEMBLY (SB265)

Types of Air Contaminants Permitted

- Effective December 1, 2006, Ohio EPA amended the definition of air contaminant source in OAC rule 3745-31-01 in order to implement the requirements of division (F)(3)(a) to (F)(3)(c) of ORC 3704.03.

ORC 3704.03(F)(3) Not later than two years after the effective date of this amendment, the director shall adopt a rule in accordance with Chapter 119. of the Revised Code specifying that a permit to install is required only for new or modified air contaminant sources that emit any of the following air contaminants:

(a) An air contaminant or precursor of an air contaminant for which a national ambient air quality standard has been adopted under the federal Clean Air Act;

(b) An air contaminant for which the air contaminant source is regulated under the federal Clean Air Act;

(c) An air contaminant that presents, or may present, through inhalation or other routes of exposure, a threat of adverse human health effects, including, but not limited to, substances that are known to be, or may reasonably be anticipated to be, carcinogenic, mutagenic, teratogenic, or neurotoxic, that cause reproductive dysfunction, or that are acutely or chronically toxic, or a threat of adverse environmental effects whether through ambient concentrations, bioaccumulation, deposition, or otherwise, and that is identified in the rule by chemical name and chemical abstract service number.
