

Public Notice
Ohio Environmental Protection Agency
Redesignation and Maintenance Plan for the Eight-Hour Ozone Basic
Nonattainment Columbus Area

Delaware, Fairfield, Franklin, Knox, Licking and Madison Counties

Notice is hereby given that the Director of the Ohio Environmental Protection Agency, (Ohio EPA) is requesting that the United States Environmental Protection Agency (U.S. EPA) revise the current air quality designation for the Columbus area, including Delaware, Fairfield, Franklin, Knox, Licking and Madison counties to attainment with respect to the 1997 eight-hour ozone standard. Air quality monitoring data collected in the region demonstrate attainment of the national ambient air quality standards (NAAQS) and there is evidence that the improved air quality is due to permanent, enforceable emission reductions. In addition, existing requirements are sufficient to maintain the 1997 eight-hour ozone standard in this area at least ten years into the future.

Existing state and federal emission reduction requirements are sufficient to attain and maintain the NAAQS in the Columbus area. Therefore, Ohio EPA proposes to utilize existing emission inventory information and projections of future emissions as the demonstration of the ability to maintain the NAAQS in the Columbus area in the future.

The Columbus area is currently designated as basic nonattainment for the 1997 eight-hour ozone standard. As part of an acceptable maintenance plan, Ohio EPA is required to develop a contingency plan to provide for additional emission reductions if a violation of the NAAQS is monitored after the area has been redesignated. These reductions will help alleviate the ambient problem until a revised SIP can be developed.

The State of Ohio proposes to:

1. Request the U.S. EPA redesignate the Columbus area to attainment with respect to the 1997 eight-hour ozone standard and revise the maintenance plan. This request will document that existing enforceable control measures are responsible for the observed improvement in air quality.
2. Designate existing controls as sufficient to maintain the NAAQS into the future.
3. Commit to the proposed contingency plan.

These actions must be noticed to allow public comment and to satisfy U.S. EPA requirements for public involvement in SIP related activities. This notice addresses Ohio EPA's reliance on the emission projections as evidence of attainment and maintenance and the commitment to institute contingency measures if ambient exceedances or violations trigger the contingency plan requirements. Written comments will be received on or before March 3, 2009 at the following address:

Pursuant to Section 119.03 of the Ohio Revised Code, a public hearing on this redesignation request will be conducted as follows: March 2, 2009 at 2:30 P.M., at Ohio Environmental Protection Agency Lazarus Government Center located at 50 West Town Street, Suite 700, Columbus, Ohio.

All interested persons are entitled to attend or be represented at the hearings and give written or oral comments on these changes. All oral comments presented at the hearing, and all written statements submitted at the hearing or to the above address by the close of business on March 3, 2009 will be considered by Ohio EPA prior to final action on this redesignation. Written statements submitted after March 3, 2009 may be considered as time and circumstances permit, but will not be part of the official record of the hearing.

This redesignation and maintenance request is available on Ohio EPA DAPC's Web page for electronic downloading by clicking on "State Implementation Plan" under the "topics" drop-down box.
