

Public Notice
Ohio Environmental Protection Agency
Ohio Air Monitoring Network 2009-2010

Notice is hereby given that the Director of the Ohio Environmental Protection Agency, (Ohio EPA) required by 40 CFR 58.10 is making its Air Monitoring Network 2009-2010 plans for ambient air monitoring available for a 30-day public comment period. The plans include, as a separate item, the new required plan for a monitoring network based upon the revised National Ambient Air Quality Standard for airborne lead. The new standard for lead of 0.15 micrograms per cubic meter of air as a rolling 3-month average requires a revised lead monitoring network to begin sampling January 1, 2010. All plans for the monitoring of lead, sulfur dioxide, carbon monoxide, nitrogen dioxide, ozone and fine particulates are subject to approval by the United State Environmental Protection Agency (U.S. EPA). The plans for the new lead monitoring network and for the Ohio Air Monitoring Network may be viewed at:

<http://www.epa.ohio.gov/dapc/ams/plan.html>

These air monitoring plans must be noticed to allow public comment and to satisfy U.S. EPA requirements for public involvement in air monitoring activities. This notice addresses Ohio EPA's reliance on air monitoring as evidence of attainment and maintenance and the commitment to institute contingency measures if ambient exceedances or violations trigger the contingency plan requirements. **Written comments must be received on or before August 6, 2009** at the following address:
