

Electronic Drinking Water Reports (eDWR) updates

The following is a list of the updates made to eDWR and implemented on January 6, 2012.

Surface Water MOR (SWTR_MOR.xls - Version 2.0.4 December 13, 2011)

1. Requires user to check and confirm the Reporting period.
2. Confirms that the file being uploaded is the appropriate form.
3. Confirms that user is associated to the PWS being reported.
4. Addendum: Validates that each field of the individual Filter Event table is completed when an IFE Event occurs.

Filter Number	Individual Filter Event	Date	Time	Turbidity or Duration/Frequency
---------------	-------------------------	------	------	---------------------------------

5. The Four turbidity fields updated to three Decimals (1.123).

Plant Distribution MOR (PLANT_MOR.xls - Version 2.0.4 December 13, 2011)

1. Requires user to check and confirm the Reporting period.
2. Confirms that the file being uploaded is the appropriate form.
3. Confirms that user is associated to the PWS being reported.
4. Alkalinity Phenol change field to Whole number.
5. Alkalinity Stability change to one decimal (1.1).
6. Iron (Daily and QC) change to two decimals (1.12).

Chemical SSR (Lab_GC.xls - Version 2.0.0 December 12, 2011)

1. Confirms that the file being uploaded is the appropriate form.
2. Added a missing Units Code of UMHO/CM to the dropdown list.

Coliform SSR (Lab_Coliform.xls - Version 2.0.0 December 12, 2011)

1. Confirms that the file being uploaded is the appropriate form.
