

OHIO E.P.A.
FEB -7 2007
ENTERED DIRECTOR'S JOURNAL

OHIO ENVIRONMENTAL PROTECTION AGENCY
DIVISION OF DRINKING AND GROUND WATERS
UNDERGROUND INJECTION CONTROL PERMIT TO OPERATE
CLASS V INJECTION WELL

Ohio Permit No. UIC 05-07-10-PTO-V

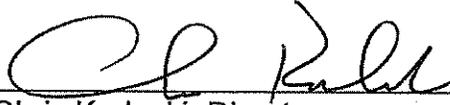

Applicant: Bellaire Corporation
Address: 14785 Preston Rd, Suite 1100
Dallas, Texas 75240-7891
Telephone: (214) 239-2625
Facility Name: Bellaire Corporation
Facility Location: Located at Section 15, York Township,
Belmont County,
Powhatan Point, Ohio 43942
Description: Class V Underground Injection Well to inject treated
acid mine drainage (AMD) (Well 5B Town Run
Refuse Site).
Issuance Date: February 7, 2007
Effective Date: February 7, 2007
Expiration Date: February 12, 2012

The above named applicant is hereby ISSUED a Permit to Operate for the above described underground injection well pursuant to Sections 6111.043 and 6111.044 of the Ohio Revised Code and to Chapter 3745-34 of the Ohio Administrative Code. Issuance of this Permit to Operate does not constitute expressed or implied approval or agreement that, if constructed and/or modified in accordance with the specifications and/or information accompanying the permit application, the above described source of environmental pollutants will operate in compliance with applicable State and Federal laws and rules and regulations. This Permit to Operate is issued subject to the attached conditions which are hereby incorporated and made a part hereof.

I certify this to be a true and accurate copy of the official documents as filed in the records of the Ohio Environmental Protection Agency.

By: Imyja Jackson Date: 2-7-07

Expiration Date: This permit shall expire at midnight on the expiration date indicated above, unless terminated or modified under Chapter 3745-34 of the Ohio Administrative Code.

Chris Korleski, Director
OHIO ENVIRONMENTAL PROTECTION AGENCY

PART I

GENERAL PERMIT COMPLIANCE

A. EFFECT OF PERMIT

The permittee is authorized to engage in operation of a Class V underground injection well in accordance with Chapter 3745-34 of the Ohio Administrative Code (OAC) and the conditions of this permit. Notwithstanding any other provisions of this permit, the permittee shall not construct, operate, maintain, convert, plug, abandon, or conduct any other injection activity in a manner that allows the movement of injection, annulus or formation fluids into underground sources of drinking water (USDW). Any underground injection activity not specifically authorized in this permit is prohibited. Compliance with this permit during its term constitutes compliance for purposes of enforcement, with Sections 6111.043 and 6111.044 of the Ohio Revised Code (ORC). Such compliance does not constitute a defense to any action brought under ORC Sections 6109.31, 6109.32 or 6109.33 or any other common or statutory law other than ORC Sections 6111.043 and 6111.044. Issuance of this permit does not convey property rights of any sort or any exclusive privilege; nor does it authorize any injury to persons or property, any invasion of other private rights, or any infringement of state or local law. Nothing in this permit shall be construed to relieve the permittee of any duties under applicable state and federal law or regulations.

B. PERMIT ACTIONS

1. Modification, Revocation, Reissuance and Termination. The Director may, for cause or upon request from the permittee, modify, revoke and reissue, or terminate this permit in accordance with OAC Rules 3745-34-07, 3745-34-23, and 3745-34-24. Also, the permit is subject to minor modifications for cause as specified in OAC Rule 3745-34-25. The filing of a request for a permit modification, revocation and reissuance, or termination, or the notification of planned changes, or anticipated noncompliance on the part of the permittee does not stay the applicability or enforceability of any permit condition.
2. Transfer of Permits. This permit may be transferred to a new owner or operator only if it is modified or revoked and reissued pursuant to OAC Rule 3745-34-22(A), 3745-34-23, 3745-34-24, 3745-34-25(D) or 3745-34-26(L)(3), as applicable.

C. SEVERABILITY

The provisions of this permit are severable, and if any provision of this permit or the application of any provision of this permit to any circumstance is held invalid, the application of such provision to any other circumstances and the remainder of this permit shall not be affected thereby.

D. CONFIDENTIALITY

In accordance with OAC Rule 3745-34-03 any information submitted to the Ohio EPA pursuant to this permit may be claimed as confidential by the submitter. Any such claim must be asserted at the time of submission by stamping words "confidential business information" on each page containing such information. If no claim is made at the time of submission, the Ohio EPA may make the information available to the public without further notice. If a claim is asserted, documentation for the claim must be tendered and the validity of the claim will be assessed in accordance with the procedures in OAC Rule 3745-34-03. If the documentation for the claim of confidentiality is not received, the Ohio EPA may deny the claim without further inquiry. Claims of confidentiality for the following information will be denied:

1. The name and address of the permittee;
2. Information which deals with the existence, absence or level of contaminants in receiving water.

E. DUTIES AND REQUIREMENTS (OAC RULE 3745-34-26)

1. Duty to Comply. The permittee shall comply with all applicable UIC regulations and conditions of this permit, except to the extent and for the duration such noncompliance may be authorized by an emergency permit issued in accordance with OAC Rule 3745-34-19. Any permit noncompliance constitutes a violation of ORC Chapter 6109. or 6111. and is grounds for enforcement action, permit termination, revocation and reissuance, modification, or denial of a permit renewal application. Such noncompliance also may be grounds for enforcement action under other applicable state and federal law.
2. Penalties for Violations of Permit Conditions. Any person who violates a permit requirement is subject to injunctive relief, civil penalties, fines and/or other enforcement action under ORC Chapters 6111., 6109., or 3734. Any person who knowingly or recklessly violates permit conditions may be subject to criminal prosecution.

3. Continuation of Expiring Permits.

- a. Duty to Reapply. If the permittee wishes to continue an activity regulated by this permit after the expiration date of this permit, the permittee shall submit a complete application for a new permit at least 180 days before this permit expires.
 - b. Permit Extensions. The conditions of an expired permit may continue in force in accordance with Section 119.06 of the Revised Code until the effective date of a new permit, if:
 1. The permittee has submitted a timely application which is a complete application for a new permit; and
 2. The Director, through no fault of the permittee, does not issue a new permit with an effective date on or before the expiration date of the previous permit; and
 3. The new permit has not been denied, and if a denial has been appealed, the denial has not been upheld.
 - c. Effect. Permits continued under Section 119.06 of the Revised Code remain fully effective and enforceable.
 - d. Enforcement. When the permittee is not in compliance with the conditions of the expiring or expired permit the Director may choose to do any or all of the following:
 1. Initiate enforcement action based upon the permit which has been continued;
 2. Issue a notice of intent to deny the new permit. If the permit is denied, the owner or operator is required to cease the activities authorized by the continued permit or be subject to enforcement action for operation without a permit;
 3. Issue a new permit under Section 6111.044 of the Revised Code with appropriate conditions; or
 4. Take other actions as set forth in Chapter 3745-34 of the OAC.
4. Need to Halt or Reduce Activity Not a Defense. It shall not be a defense, for a permittee in an enforcement action, that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

5. Duty to Mitigate. The permittee shall take all reasonable steps to minimize or correct any adverse impact on the environment resulting from noncompliance with this permit.
6. Proper Operation and Maintenance. The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance includes effective performance, adequate funding, adequate operator staffing and training, and adequate laboratory and process controls, including appropriate quality assurance procedures. This provision requires the operation of back-up or auxiliary facilities or similar systems only when necessary to achieve compliance with the conditions of this permit.
7. Duty to Provide Information. The permittee shall furnish to the Director, within a time specified, any information which the Director may request in order to determine whether cause exists for renewing, modifying, revoking and reissuing, or terminating this permit. To determine compliance with this permit, or to issue a new permit the permittee shall furnish to the Director, upon request, copies of all records required to be kept by this permit.
8. Inspection and Entry. The permittee shall allow the Director, or an authorized representative, upon the presentation of credentials and other documents as may be required by law to:
 - a. Enter permittee's premises where a regulated facility or activity is located or conducted, or where records are kept under the conditions of this permit;
 - b. Have access at reasonable times to and copy any records that are kept under the conditions of this permit;
 - c. Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and
 - d. Sample or monitor at reasonable times for the purposes of assuring permit compliance or as otherwise authorized by ORC Chapter 6111. and OAC Chapter 3745-34, any substances or parameters at any location.
9. Records.
 - a. The permittee shall retain copies of records of all monitoring information, including all calibration and maintenance records and copies of all reports required by this permit for a period of at least five (5) years from the date of the sample, measurement or report or for the duration of the permitted life the well, whichever is longer.

- b. The permittee shall maintain copies of records of all data required to complete the permit application form for this permit and any supplemental information submitted under OAC Rule 3745-34-16 for a period of at least five (5) years from the date the application was signed. These periods may be extended by request of the Director during that period of time.
 - c. The permittee shall retain copies of records concerning the nature and composition of all injected fluids until three (3) years after the completion of plugging and abandonment which has been carried out in accordance with OAC Rule 3745-9-10.
 - d. The permittee shall continue to retain such copies of records after the retention period specified by paragraphs (a) to (c) above, unless he delivers the records to the Director or obtains written approval from the Director to discard the records.
 - e. Records of monitoring information shall include:
 - i. The date, exact place, and time of sampling or measurements;
 - ii. The name(s) of the individual(s) who performed the sampling or measurements;
 - iii. A precise description of both sampling methodology and the handling and custody of samples;
 - iv. The date(s) analyses or measurements were performed;
 - v. The name(s) of the individual(s) who performed the analyses or measurements and the laboratory that performed the analyses or measurements;
 - vi. The analytical techniques or methods used; and
 - vii. All results of such analyses.
10. Monitoring. Samples of injected fluids and measurements taken for the purpose of injectate monitoring shall be taken at the point of injection. All samples and measurements conducted to fulfill any requirement of this permit shall be representative of the monitored activity.
- a. Monitoring the nature of injected fluids shall comply with applicable analytical methods cited and described in Table I of 40 CFR 136.3 or in Appendix III of 40 CFR Part 261 or (in certain circumstances) by other methods that have been approved by the Administrator of U.S. EPA, or by the Director.

- b. All monitoring information shall include conditions of quality assurance for each type of measurement required for reporting, in accordance with OAC Rule 3745-24-27(B)(3). Reference to established, published criteria shall be made wherever possible.
11. Signatory Requirements. All reports or other information, required to be submitted by this permit or requested by the Director, shall be signed and certified in accordance with OAC Rule 3745-34-17.
12. Reporting Requirements.
- a. Planned Changes. The permittee shall give written notice to the Director, as soon as possible, of any planned physical alterations or additions to the permitted facility. Within ten (10) days of the verbal notification, or of the commencement of construction, the permittee shall give written notice to the Director with justification of any planned physical alterations to the permitted well.
 - b. Anticipated Noncompliance. The permittee shall give advance notice to the Director of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements.
 - c. Compliance Schedules. Reports of compliance or noncompliance with, or any progress reports on, interim and final requirements contained in any compliance schedule of this permit shall be submitted no later than thirty (30) days following each schedule date.
 - d. Twenty-four (24) Hour Reporting.
 - 1. The permittee shall report to the Director any noncompliance which may endanger health or the environment. Appropriate information shall be provided orally within 24 hours from the time the permittee becomes aware of the circumstances. The following shall be included as information which must be reported orally within 24 hours:
 - i. Any monitoring or other information which indicates that any contaminant may cause an endangerment to an underground source of drinking water.
 - ii. Any noncompliance with a permit condition, or malfunction of the injection system, which may cause fluid migration into or between underground sources of drinking water.
 - 2. A written submission also shall be provided within five (5) business days of the time the permittee becomes aware of the circumstances of such noncompliance. The written submission shall contain a description of the noncompliance and its cause; the period of noncompliance, including exact dates and times, the anticipated time

it is expected to continue; and if the noncompliance has or has not been corrected, and steps taken or planned to reduce, eliminate and prevent recurrence of the noncompliance.

- e. Other Noncompliance. The permittee shall report all other instances of noncompliance not otherwise reported at the time monitoring reports are submitted. The reports shall contain the information listed in permit condition 12(d)(2) above.
- f. Other Information. When the permittee becomes aware of failure to submit any relevant facts in the permit application or that incorrect information was submitted in a permit application or in any report to the Director, the permittee shall submit such facts and corrected information within ten (10) days.
- g. Within thirty (30) days of receipt of this permit, the person designated as responsible for submission of reports pursuant to OAC Rule 3745-34-17 shall certify to the Director that he or she has read and is personally familiar with all terms and conditions of this permit. The Director shall be notified immediately, in writing, if the designee or position is changed.
- h. Monthly Operating Reports shall be submitted as required in Part II of this permit.

G. PLUGGING AND ABANDONMENT

1. Plan for Plugging and Abandonment. Before the well operated pursuant to this permit is taken out of service, the permittee shall submit to the Ohio Environmental Protection Agency a plan for the plugging and abandonment of the well. The required plan shall be submitted at least sixty (60) days prior to the planned activities and specify procedures and contain such other provisions as are necessary to ensure that no movement of fluids into an underground source of drinking water is allowed. After review and written approval of this plan by the Ohio Environmental Protection Agency, that plan shall automatically become a condition of this permit.
2. Abandonment Requirements. Injection wells declared as temporarily abandoned shall be maintained in strict compliance with Rule 3745-9-09 of the OAC to insure that the well will not endanger underground sources of drinking water during the period of temporary abandonment. Injection wells declared as permanently abandoned shall be plugged in accordance with Rule 3745-9-10(C) of the OAC.
3. Plugging Report. Within thirty (30) days after plugging the well, the permittee shall submit a plugging report to the Director. The report shall be certified as accurate by the person who performed the plugging operation and by the

permittee and shall contain a statement defining the plugging procedure. At a minimum, the report shall include: The nature and quantity of materials used in the plugging; Surface and subsurface diagrams locating the position at which the plugs are situated; and, a description of all casing, subsurface structures and piping left in the well or subsurface.

H. FINANCIAL RESPONSIBILITY

1. Financial Responsibility. The permittee is required to maintain financial responsibility and resources to close, plug, and abandon the underground injection operation in a manner consistent with Chapters 3745-9 and 3745-34 of the OAC. The permittee is required to show evidence of current financial responsibility to the Director in the form of a surety bond submitted within 45 days of the effective date of this permit, and once every twelve (12) months thereafter.

I. CORRECTIVE ACTION

1. The permittee shall develop a corrective action plan in the event that a) routine monitoring or any other information indicates that primary drinking water maximum contaminant or action levels, as defined in Chapter 3745-81 of the OAC, are or may be exceeded in any USDW within zones immediately adjacent to the injection zone; or b) any water quality parameter in any USDW in the permitted area fails to meet standards of OAC Chapter 3745-81, as a consequence of injection well operation, in a manner not permitted for underground injection as defined in Part II(A) of this permit.

Such plan shall include a determination of the nature, rate, and extent of the degradation. The Director may also require the plan to include appropriate remedial actions including, but not limited to: selective mine sealing, additional chemical treatment, or discontinuances of injection operations.

2. The plan for corrective action shall be submitted to the Director within thirty (30) days of the date that indications of a violation of Chapter 3745-81 are noted, by the permittee through written Agency notice, and shall be approved by the Ohio EPA prior to implementation.

PART II
SPECIAL PERMIT CONDITIONS

A. WELL OPERATION

1. Injection Zone. The injection zone shall be limited to the Pittsburgh Number 8 Abandoned Coal Mine.
2. Injection Pressure Limitation. Injection pressure at the well head shall be limited to atmospheric pressure at all times.
3. Injectate Quality Limits. The injectate shall have a pH of 7 or above and all iron shall be in the ferric state at all times.
4. Injection Well. The permittee shall, at all times, operate the injection well in such a way that will not result in the migration of injected fluids or mine water into underground sources of drinking water above, below or adjacent to the injection formation. The permittee shall operate the injection well in such a way to ensure that primary drinking water standards, as defined in Chapter 3745-81 of the OAC, are not exceeded within any USDW above, below, or adjacent to the injection formation and that any secondary maximum contaminant levels as defined in Chapter 3745-82 of the OAC are not significantly exceeded within any USDW above, below or adjacent to the injection formation as a consequence of the injection well operation, as evidenced by mine water monitoring conducted pursuant to Part II(B)(2) of this permit. No substances other than those listed on the cover page of this permit shall be injected.

B. MONITORING

1. Injected Fluids. To be monitored:
 - a. Daily for average injection rate and injection volume; reported monthly;
 - b. Monthly for total iron, total manganese, total acidity, total alkalinity, conductivity, pH and sulfate; reported monthly;
 - c. Quarterly for calcium, magnesium, sodium, carbonate, bicarbonate, chloride, fluoride, nitrate, total dissolved solids, potassium, barium, boron, strontium, arsenic, cadmium, aluminum, antimony, cobalt, chromium, lead, mercury, selenium, silver, zinc and dissolved oxygen; reported quarterly.

2. Mine Water Down-Gradient of Injection Well. To be monitored:

Sampling for the following parameters shall be conducted every six (6) months: Calcium, magnesium, sodium, carbonate, bicarbonate, chloride, fluoride, nitrate, total dissolved solids, potassium, barium, boron, strontium, arsenic, cadmium, aluminum, antimony, cobalt, chromium, lead, mercury, selenium, silver, zinc, dissolved oxygen, total iron, total manganese, total acidity, total alkalinity, conductivity, pH and sulfate. Results of sampling and analyses shall be reported semi-annually in the subsequent monthly monitoring report submitted under Part II(C) of this permit. This monitoring shall be conducted to provide direct evidence that the injection operation complies with OAC Rule 3745-34-07(A) which prohibits the movement of fluid containing any contaminant into a USDW.

C. REPORTING

The permittee shall submit monitoring reports to the Ohio EPA, Division of Drinking and Ground Waters, Underground Injection Control Unit by the 15th day of the month following each month that monitoring results are required in accordance with schedules described in Part II(B) of this permit at the following address:

Ohio EPA
Division of Drinking and Ground Waters
Underground Injection Control Section
Lazarus Government Center
50 West Town Street
P.O. Box 1049
Columbus, Ohio 43216-1049

Reports shall contain information regarding types of tests and methods used to generate monitoring data, as specified in Part I(E)(10) of this permit.
