

Evaluating brownfields for new economic opportunities

BROWNFIELDS AND THE OIL/GAS PLAYS IN OHIO

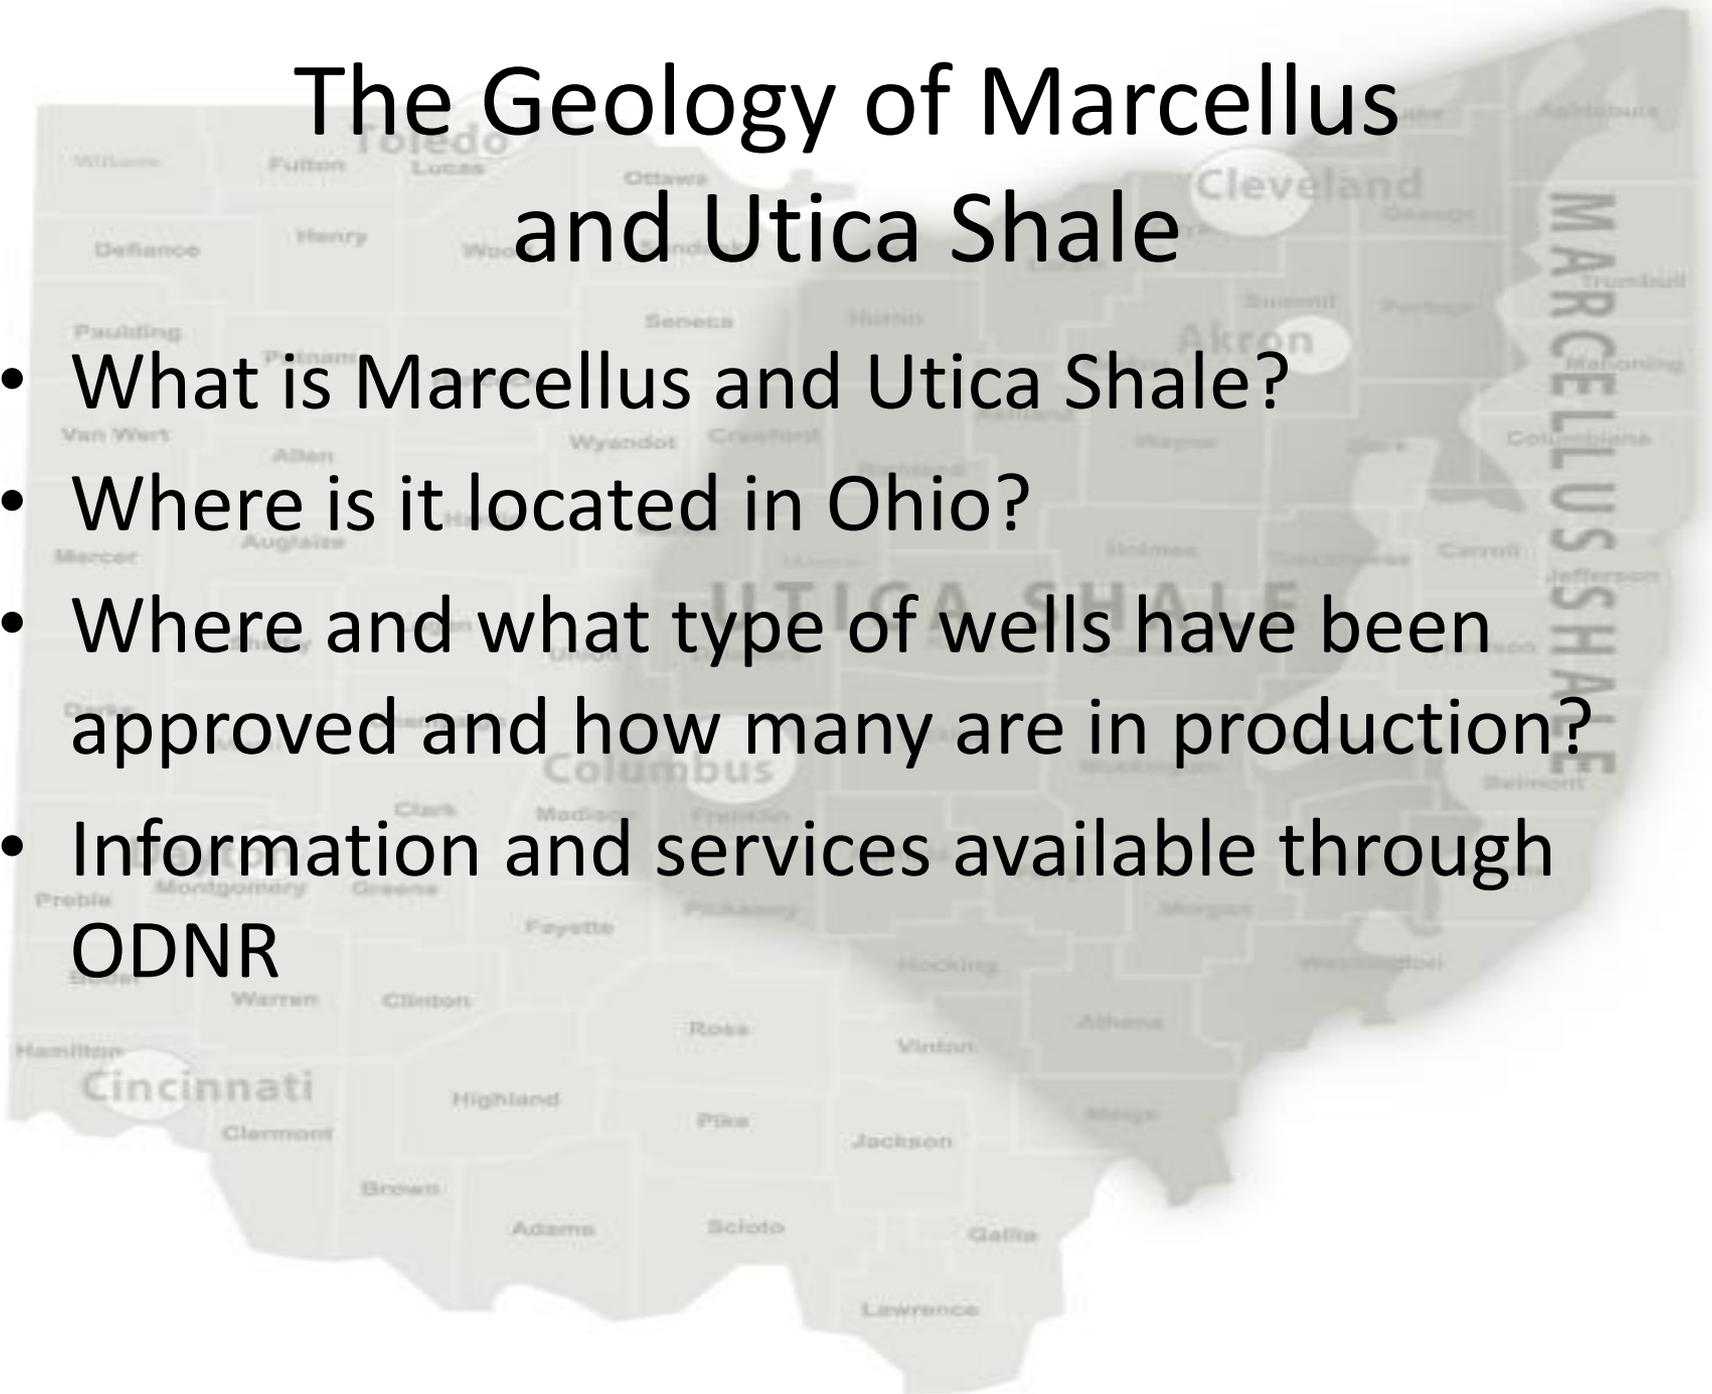

Brownfields and the Oil/Gas Boom

- How can brownfields play in an important role?
- Why are brownfields a good fit for short term or 'interim' uses during the Oil/Gas boom?
- How can you identify brownfields with potential for reuse in your area?
- How we can help!
- But first...

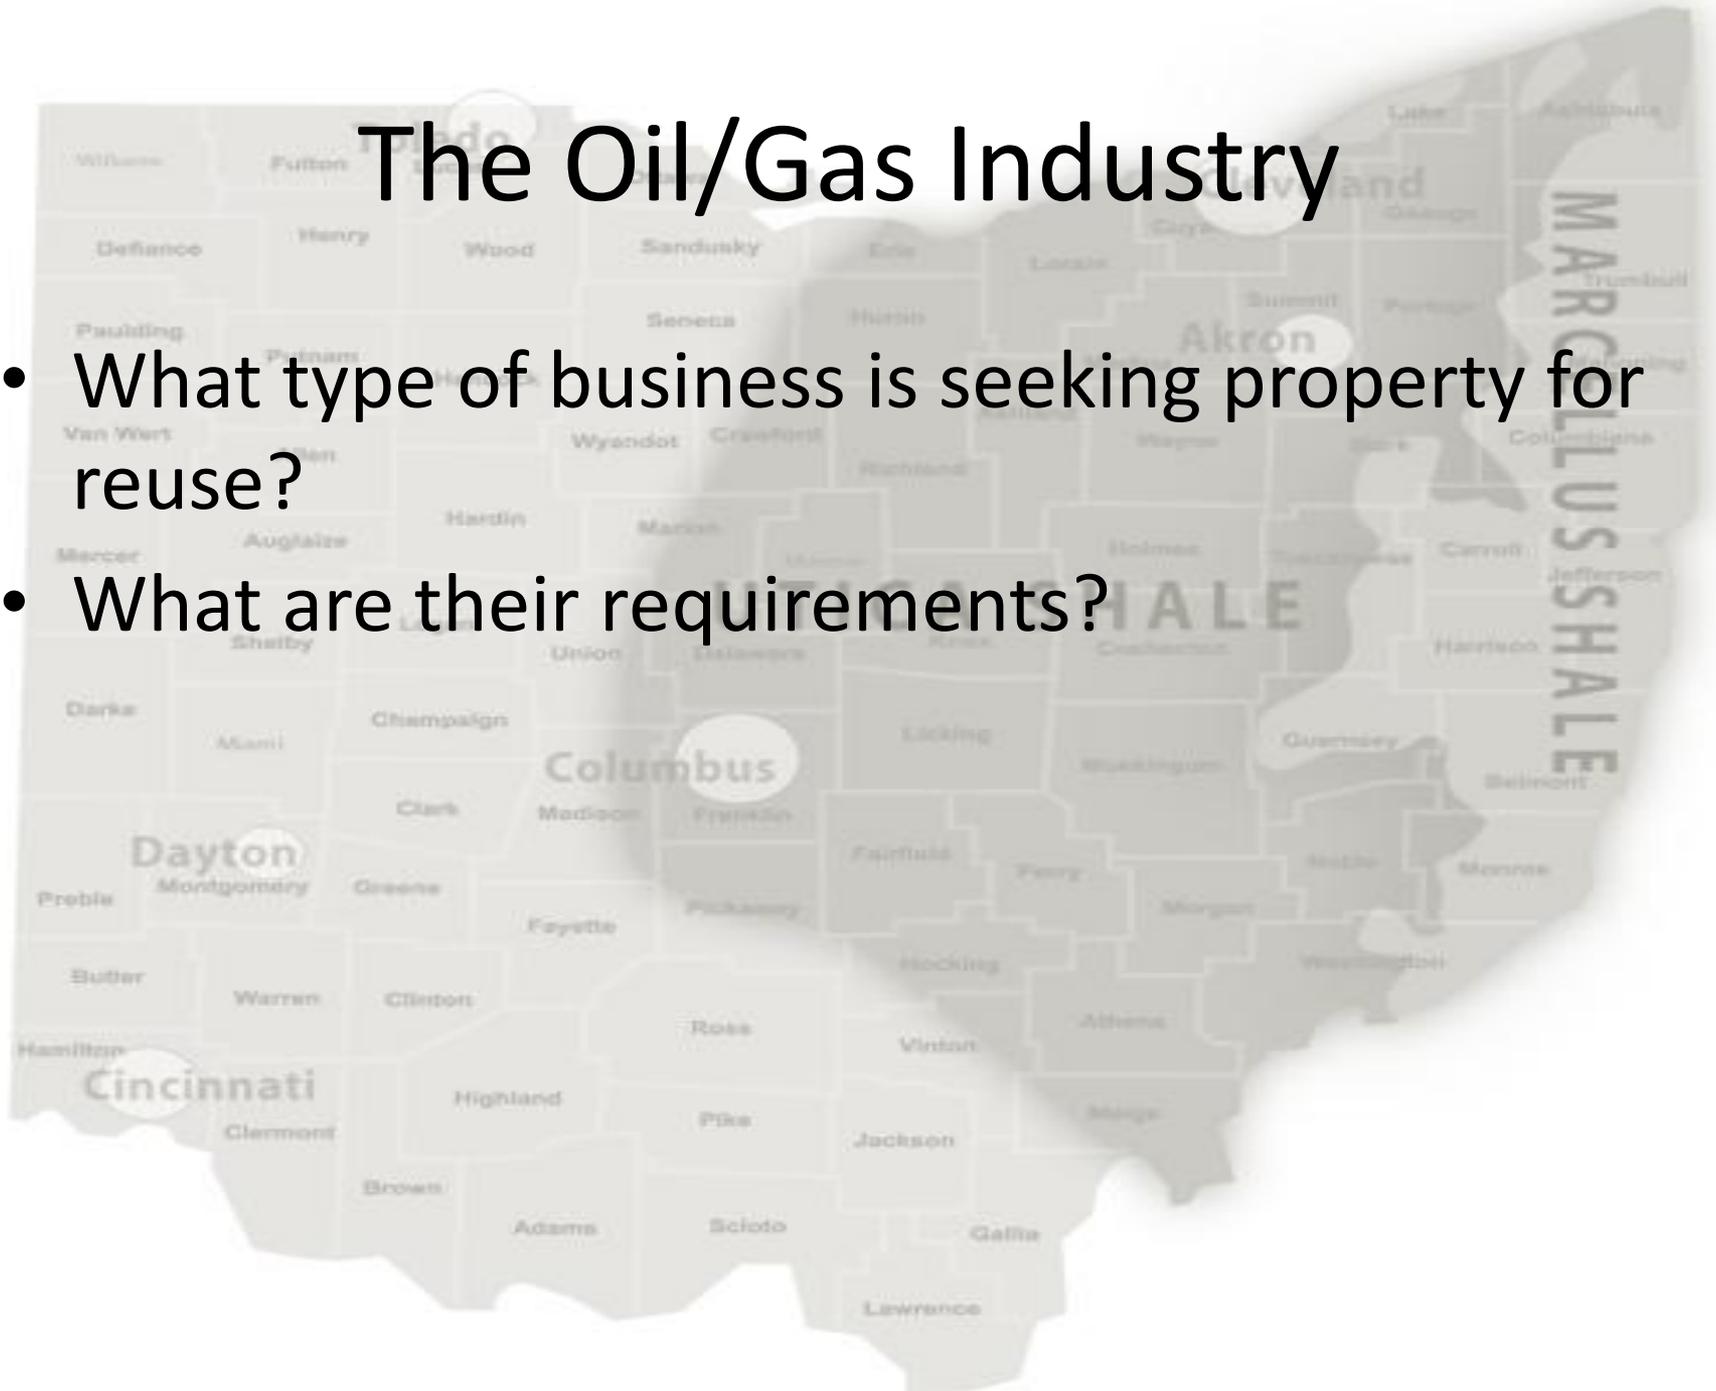

The Geology of Marcellus and Utica Shale

- What is Marcellus and Utica Shale?
- Where is it located in Ohio?
- Where and what type of wells have been approved and how many are in production?
- Information and services available through ODNR

The Oil/Gas Industry

- What type of business is seeking property for reuse?
- What are their requirements?

Finding a site with potential

- Where to begin
- Local contacts and partners
- What can you offer prospective businesses?
- Creating opportunities
- Making sustainable investment choices for the future

How we can help!

- Staff of geologists and environmental specialists to aid in the inventorying process
- GIS mapping capabilities
- Negotiating environmental issues
- Compiling resources
