

## Operable Unit 3 (OU3)

Landfills 11, 12, and 14; Fire Training Areas 2, 3, 4, and 5; Earthfill Disposal Zones 11 and 12, Spill Site 1

Landfill 11 was regraded to improve drainage and eliminate ponding. Regrading was completed in March 1997. Landfill 12 was a half acre chemical disposal area consisting of trenches approximately 2 feet wide by 3 feet deep. In December 1997, the entire contents of Landfill 12 were removed, and disposed off-site at hazardous waste treatment facilities. Site investigations indicated remedial actions were not necessary for the other sites within this OU. Long-term monitoring is addressed under the Basewide Monitoring Program.
