History of use:	The property had previously been used to produce a variety of components used in electrical distribution equipment at the Dellinger Road facility. These components were used in the assembly of circuit breakers, switches, power distribution boxes, and other related electrical products. More recent manufacturing processes include plating, stamping, molding, welding, metal deburring, and other related operations. Gould Electronics, Inc. was the operator of the facility until Siemens Industry began using the facility in 1983.
