

DERR Database

The Division of Environmental Response and Revitalization (DERR) database is an index of sites for which our district offices maintain files. The database is NOT a record of contaminated sites in Ohio. Not all sites in the database are contaminated, and a site's absence from the database does not imply that it is uncontaminated. The database is also not a list of brownfield sites. Not all sites in the database meet the federal or state definitions of brownfields, and many properties in Ohio which would qualify as brownfields are not in the database.

The DERR database contains basic site information only. Site information maintained in the database includes the name and address of the site; its latitude and longitude; whether the property is, to Ohio EPA's knowledge, being cleaned up in accordance with the Voluntary Action Program (VAP) or is receiving technical assistance through the VAP; and whether Clean Ohio Fund money has been issued to remediate the site. Detailed information regarding the status of each site can be provided by the appropriate **District Office** .

The data contained in the DERR database can be provided upon request. Requests should include the area of interest (city, county, zip code, statewide, etc.) and whether the file should be provided in electronic form or as a hard-copy. To request data contained in the DERR database or for more information about the database, please contact:
