Dear Ms. Knowles:

On July 27, 2007, Ohio EPA received Von Roll America, Inc.'s request to collect pre-acceptance samples from third party waste once the waste has arrived at the facility. For this modification, Von Roll America, Inc. submitted a Class 2 modification application¹. The Agency did not receive any verbal or written comments concerning this Class 2 modification application. I have enclosed the final modified Ohio hazardous waste facility installation and operation permit (Permit) that was issued by the director today. Please note that the modified Permit remains in effect until it is renewed, withdrawn, suspended or revoked.

You are hereby notified that this action of the Director is final and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00 which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

**SUMMARY OF MODIFICATIONS TO HAZARDOUS WASTE
INSTALLATION AND OPERATION PERMIT**

Von Roll America, Inc.
U.S. EPA ID No.: OHD 980 613 541
Ohio ID No.: 02-15-0589

Modification of the Hazardous Waste Facility Installation and Operation Permit will authorize Von Roll America, Inc. (VRA) to make the following change:

Class 2 Modification:

To allow the Permittee to collect pre-acceptance samples from third party waste once the waste has arrived at the facility. The ability to sample third party waste upon arrival will not change the sample analyses that are conducted. The Permittee will continue to analyze samples of waste for the required pre-acceptance parameters, as well as the required fingerprint parameters. Third party waste is waste that is managed by the Permittee, before transfer to another permitted treatment facility where the waste will be processed for reclamation, recycling, or disposal, as appropriate.
