Records - ORC § 317.08

ENVIRONMENTAL COVENANT

This Environmental Covenant is entered into by Morabito Enterprises, Inc., an Ohio corporation ("Owner"), and the Ohio Environmental Protection Agency ("Ohio EPA") pursuant to Ohio Revised Code ("ORC") §§ 5301.80 to 5301.92 for the purpose of subjecting the Property described in section 2 herein ("the Property"), to the activity and use limitations set forth herein.

This Environmental Covenant concerns an area known as the American Steel and Wire – TOW (ASW) Site. In a Decision Document dated January 16, 2014, the Director of Ohio EPA selected a remedial action for the ASW Site requiring, among other things, restrictions on ground water use and reducing and/or eliminating human exposure through direct contact with contaminated soil, on the Site. The Ohio EPA issued a Statement of Basis seeking public input on the proposed remedy, but did not receive comments concerning that document. The Decision Document for the Final Corrective Action was journalized on January 22, 2014.

A Part A Permit Application for RCRA Hazardous Waste Facility Treatment, Storage, and Disposal (TSD) permit (for storage of on-site generated hazardous waste in containers on the Property) was submitted and was journalized on November 30, 1981 by the Ohio Hazardous Facility Approval Board (HWFAB). A Closure Plan for the closure of identified RCRA hazardous waste management units at ASW was submitted in 1991 and was approved by Ohio EPA. Closure procedures were found to meet the requirements of OAC Rule 3745-66-11, and the closure certification was accepted by Ohio EPA on March 28, 1994. There was no evidence of off-site contamination.

In 2011, a sampling investigation was conducted to evaluate the Site Property with regard to RCRA Corrective Action obligations in an area identified as having residual historic contamination. The investigation revealed that, although contamination continued to exist, the levels were acceptable for industrial/commercial land use, the Site Property did not pose a risk to human health and the environment when land use is restricted to commercial/industrial use and ground water restrictions are applied. Subsequently also, a layer of fill (comprised of natural material obtained from the

excavation of soil during the installation of the Northeast Ohio Regional Sewer District Euclid Creek Storage Tunnel Project in Cleveland) was added to the property by the Owner providing an additional layer of protection for potential receptors.

As part of the closure of, and corrective actions obligations pertaining to the Property pursuant to the Permit and Ohio hazardous waste requirements contained in ORC Chapter 3734, the Owner has agreed to restrictions on the future use of Property, as described herein.

Now therefore, Owner and Ohio EPA agree to the following:

1. Environmental Covenant. This instrument is an environmental covenant developed and executed pursuant to ORC §§ 5301.80 to 5301.92.
2. Property. This Environmental Covenant concerns approximately 3.75 acres (Permanent Parcel No.: 133-13-003) located at 7840 Wire Avenue, Cleveland, Ohio, being part of Sublot Nos. 61, 74 through 81 and 85, part of vacated Wire Avenue S.E. and part of vacated Jones Road S.E. in The B.B. Nothing in this Environmental Covenant shall restrict the Director of Ohio EPA from exercising any authority under applicable law.

9. Rights of Access. Owner hereby grants to Ohio EPA's authorized representatives, Holders and the City of Cleveland the right of access to the Property for implementation or enforcement of this Environmental Covenant and shall require such access as a condition of any transfer of the Property or any portion thereof.
