

Re: Interested Party Review – Industrial Solid Waste landfill Rules

The Division of Materials and Waste Management (DMWM) is in the process of conducting a review of the regulations for industrial solid waste landfill. This review is being conducted to satisfy requirements mandated by Ohio Revised Code (ORC) Section 119.032 which requires all state agencies to review each of their rules every five years to determine whether or not to continue the rules without change, amend the rules, or rescind the rules.

DMWM has reviewed the current effective rules and has decided that the following industrial solid waste landfill rules should be retained without change. The following industrial solid waste landfill rules are included in this package:

<u>Rule #</u>	<u>Title:</u>
3745-29-01	Definitions
3745-29-02	Applicability
3745-29-06	Industrial solid waste landfill permit to install application
3745-29-07	Additional criteria for approval of industrial solid waste landfill permit to install application
3745-29-08	Industrial solid waste landfill facility construction
3745-29-10	Ground water monitoring program for an industrial solid waste landfill facility
3745-29-11	Final closure of an industrial solid waste landfill facility
3745-29-14	Post closure care of industrial solid waste landfill facilities
3745-29-19	Operational criteria for an industrial solid waste landfill facility

DMWM released an Early Stakeholder Outreach Document on January 18, 2012 notifying the public of our intent to file a determination that the industrial solid waste landfill rules be retained without change with the Joint Committee on Agency Rule Review (JCARR) the rules as “No Change.” Due to the positive feedback received, DMWM is now releasing a draft of the unchanged rules and associated Business Impact Analysis (BIA) for interested party review.

Where can I get a copy of the draft rules?

What should I consider as I prepare my comments?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.
2. Describe any assumptions that you used.
3. Provide any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at your estimate.
5. Provide specific examples to illustrate your concerns.
6. Offer alternatives.
7. Make sure to submit your comments by the comment period deadline.

Thank you for your interest and we look forward to hearing from you.

Sincerely,

Pamela S. Allen, Chief
Division of Materials and Waste Management
