**Re: Noble Road Landfill, Richland County  
Ohio Administrative Code (OAC) Rule 3745-27-10(D)(7)(c)(ii) Approval**

Dear Mr. Green:

On March 6, 2012, the Ohio Environmental Protection Agency (Ohio EPA), Division of Materials and Waste Management (DMWM), Northwest District Office (NWDO) received a document titled, "OAC 3745-27-10(D)(7)(c)(ii) Demonstration for Sodium at MW-20 and Selenium at BW-1, BW-11, BW-15, and BW-8 2011 Second Semiannual Sampling Event Noble Road Landfill" dated February 29, 2012, for the Noble Road Landfill (Facility) located in Richland County. The above referenced document was submitted by Eagon and Associates, on behalf of the owner/operator of Noble Road Landfill.

According to the document, analysis of the ground water detection monitoring data indicated that the following statistically significant changes were detected: sodium in monitoring well MW-20, and selenium in monitoring wells BW-1, BW-8, BW-11, and BW-15.

The document contains the ground water sampling results and the statistical analysis for samples collected during the November 8 and 9, 2011, sampling event and the December 27 and 28, 2011, resampling event.

Pursuant to OAC Rule 3745-27-10(D)(7)(c)(ii), the owner or operator may demonstrate that a source other than the sanitary landfill facility caused the contamination, or that the statistically significant change resulted from error in sampling, analysis, or statistical evaluation or natural variation in ground water quality. A report documenting this demonstration must be submitted to and approved by Ohio EPA. If the owner or operator does not obtain approval to continue detection monitoring within two hundred ten (210) days from initial sampling, the owner or operator is required to comply with the provisions of OAC Rule 3745-27-10(E) for ground water quality assessment monitoring.

The February 29, 2012, document concluded that the statistically significant change for sodium in monitoring well MW-20 was due to an error in statistical evaluation, and not as a result of impact from the landfill.

The document also concluded that the statistically significant changes for selenium in monitoring wells BW-1, BW-8, BW-11, and BW-15 were due to an error in analysis, and not as a result of impact from the landfill.

Ohio EPA has reviewed the applicable information and concurs with the demonstration for sodium in monitoring well MW-20, and selenium in monitoring wells BW-1, BW-8, BW-11, and BW-15, included in the February 29, 2012, document. Therefore, pursuant to OAC Rule 3745-27-10(D)(7)(c)(ii), the owner or operator is hereby authorized to continue the detection monitoring program at the Facility for monitoring wells MW-20, BW-1, BW-8, BW-11, and BW-15.

Should future or existing ground water sampling results indicate statistically significant changes in ground water monitoring parameters, the owner or operator will be required to either enter into the ground water quality assessment monitoring program in accordance with OAC Rule 3745-27-10(E) or obtain approval to remain in the detection monitoring program pursuant to OAC Rule 3745-27-10(D)(7)(c).

This approval shall not be construed to release the owner or operator from the obligation to comply with the requirements of any other ground water quality assessment monitoring program being conducted at the Facility.

A detailed account of Ohio EPA's review of the ground water demonstration will be sent to you under separate cover.

You are hereby notified that this action of the Director of Environmental Protection (Director) is final and may be appealed to the Environmental Review Appeals Commission pursuant to Ohio Revised Code Section 3745.04. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00 made payable to "Treasurer, State of Ohio." The Commission, in its discretion, may reduce the fee if by affidavit it is demonstrated that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section.

Mr. Alvie Green
