Ground Water Monitoring Alternate Parameter List**

OHIO EPA
DEC 17 2002
ENERGY AND ENVIRONMENTAL SERVICES

Dear Mr. Porath:

On July 31, 2002, the Southeast District Office (SEDO) of Ohio EPA received a report from Eagon & Associates, Inc., for the Coshocton Landfill, Inc. (CLI), owned and operated by Waste Management of Ohio, Inc. This report requested an alternate groundwater monitoring list for CLI pursuant to Ohio Administrative Code (OAC) rule 3745-27-10(D)(2). Your request is based on the fact that analyses of the annual leachate and previous ground water samples collected at the site have not detected any of the Appendix I parameters noted in your request. Representatives from the Division of Drinking and Ground Waters (DDAGW) and the Division of Solid and Infectious Waste (DSIWM) have reviewed the aforementioned document.

Based upon a review of the leachate and ground water monitoring data presented to Ohio EPA, the following alternate list of Appendix I inorganic indicator parameters and volatile organic compounds (VOCs) is hereby approved for a period of one year. CLI may request another alternate parameter list at that time. If another alternate list is not approved, CLI shall resume monitoring in accordance with OAC 3745-27-10(D)(1).
