Note: Italicized bodies of water have fish with low levels of contaminants and a *less strict* advisory than the statewide "one meal per week" advice.

The following advisory has been removed:

- Mogadore Reservoir, One meal per month, Largemouth Bass, Mercury, All Waters.

The following advisory corrections have been made:

- Stillwater River – Turner Shoup Road was previously misspelled Turner Shoop Road;
- Little Beaver Creek – beginning of advisory was moved from State Route 7 to upstream of Bell School Road because the West and Middle Forks of Little Beaver Creek do not join until downstream of SR 7.
