Re: Interested Party Review

Design flow and waste strength requirements for treatment works sized for one hundred thousand gallons per day or less.

Ohio Administrative Code Chapter 3745-42

Dear Interested Parties:

This letter is to make you aware of, and solicit your input on, the Agency's proposed revisions to the following rule in OAC Chapter 3745-42.

Rule Number	Rule Title	Action
3745-42-05	Design flow and waste strength requirements for treatment works sized for one hundred thousand gallons per day or less.	Proposed

Section 119.032 of the Ohio Revised Code requires Ohio EPA to review its rules every five years to determine whether they should be changed. The Agency has reviewed the above rule and has identified minor changes. The major rule changes consist of revising the title of the rule to reflect the rule's applicability to design flow and waste strength, clarification on design of treatment systems that include flow storage and equalization, and insertion of table A-1 as a table in the rule authoring software instead of as a graphic.

The proposed rule, a fact sheet explaining the rule revisions and the public notice are posted on the Ohio EPA website at www.epa.ohio.gov/dsw/Home.aspx. If you are unable to access the web page, contact Daniel A. Kopec, with the Division of Surface Water, at (614)(644-1987) to request a copy. Comments on the rule are due to this Agency by **5:00 p.m. on January 3, 2012**. Comments should be forwarded to:

Ohio EPA, Division of Surface Water
Attn: Rule Coordinator
P.O. Box 1049
Columbus, Ohio 43216-1049
(email: dsw_rulecomments@epa.state.oh.us)

Please direct questions regarding the draft rule to **Daniel A. Kopec at (614) 644-1987**.

Sincerely,

George Elmaraghy, P.E., Chief
Division of Surface Water
