Cuyahoga Falls, OH 44221

Environmental Results

Restored and stabilized 1,000 linear feet of stream channel, 350 feet of which is 2-stage channel

Installed 10 in-stream habitat structures and 10 grade control structures

Regraded and stabilized nearly 1,875 feet of eroding stream bank (both sides) using native plants and bio-engineering techniques

Replaced 3.3 acres of lawn with 1.68 acres of riparian forest (includes 1.4 acres of native trees and shrubs plus 0.28 acres of supplemental plantings, 0.25 acres of wet meadow and 1.4 acres of native grasses and forbes)
