Public notice is hereby given that the Ohio Environmental Protection Agency (Ohio EPA) Division of Surface Water (DSW) is providing for public review and comment the Duck Creek Watershed Total Maximum Daily Load Report (TMDL) Document. Ohio EPA developed the Document in fulfillment of Section 303(d) of the Clean Water Act which requires the identification of impaired waterbodies for which technology based effluent limitations are not stringent enough to achieve applicable water quality standards and to develop Total Maximum Daily Loads for such waters. The impaired waters are located in the counties of *Washington, Noble, Guernsey, and Monroe*.
