

1. OHIO ENERGY EFFICIENT APPLIANCE REBATE PROGRAM

RECYCLING FACILITY PARTICIPANT REGISTRATION

Thank you for your interest in becoming a Recycling Facility Participant with Ohio's Energy Efficient Appliance Rebate Program. The goal of this program is to permanently remove inefficient appliances from use in Ohio.

Recycling Facility Participants must agree to disable and recycle appliances that are received through this program. Recycling Facility Participants must also agree to follow applicable state and federal regulations and provide each consumer with a receipt documenting that their appliance has been recycled.

If you are interested in becoming a Recycling Facility Participant, please complete this simple application form to start the process. Consumers and businesses looking for a recycler for their old appliances will be directed to the list of Recycling Facility Participants as part of the Energy Efficient Appliance Rebate Program. Ideally, one or more Recycling Facility Participants will be identified in each county in Ohio.

Recycling Facility Participants cannot have any outstanding, unresolved regulatory violations. Once your application is received, Ohio EPA will perform a basic compliance evaluation for each facility to determine whether any outstanding state or federal environmental violations exist. After the compliance check is complete, eligible Recycling Facility Participants will be listed on the applicable Ohio Energy Efficient Appliance Rebate Program web page(s). Inclusion on these lists does not constitute endorsement or approval by the State of Ohio.

PROGRAM DATES

Rebates for eligible refrigerators, dishwashers, clothes washers, high-efficiency gas storage water heaters, and electric heat pump water heaters must be for purchases that occur within the program's advertised dates starting as early as late March, 2010. Program dates are subject to change by the Ohio Department of Development based on consumer response and available funds.
