State's Final Algal Bloom Strategy Posted Online

The State's 2011 Harmful Algal Bloom (HAB) response strategy is final and available online at ohioalgaefinfo.com.

The final report, "Ohio Harmful Algal Bloom Response Strategy," is a coordinated effort between the Ohio EPA, Ohio Department of Health and Ohio Department of Natural Resources.

The 121-page report outlines the thresholds set for each algal toxin, establishes monitoring protocols and identifies the process for posting and removing surface and drinking water use advisories.

For up-to-date information about the latest advisories or water quality information, go to www.ohioalgaefinfo.com.
