Total microcystins sample set refers to one raw source water sample at LT2001 and one finished water sample at EP001. A week is defined as Sunday through Saturday.

*Weekly sampling unless requirements for reduced monitoring are met. Current reduced monitoring schedules can be found at http://epa.ohio.gov/ddagw/HAB.aspx. Reduced monitoring is contingent on a public water system continuing to experience NO raw or finished water total microcystins detections. Any total microcystins detections during routine (weekly) or reduced sampling will trigger additional sampling. Please refer to the website above for specifics on follow-up sampling requirements.

Cyanobacteria screening sample is to be collected biweekly from raw source water at sample point LT2001 unless requirements for reduced monitoring are met. Current reduced monitoring schedules can be found at http://epa.ohio.gov/ddogw/HAB.aspx. As of 12/31/17, all public water systems are responsible for contracting with a lab certified to perform cyanobacteria screening (qPCR). Please review the website for further information pertaining to follow-up sampling requirements for cyanobacteria screening gene detections, and certified labs that can perform analysis.

<tr>
<td>TOTAL MICROCYSTINS</td>
<td>1 Sample Set Required WEEKLY*</td>

Total microcystins sample set refers to one raw source water sample at LT2001 and one finished water sample at EP001. A week is defined as Sunday through Saturday.

*Weekly sampling unless requirements for reduced monitoring are met. Current reduced monitoring schedules can be found at http://epa.ohio.gov/ddagw/HAB.aspx. Reduced monitoring is contingent on a public water system continuing to experience NO raw or finished water total microcystins detections. Any total microcystins detections during routine (weekly) or reduced sampling will trigger additional sampling. Please refer to the website above for specifics on follow-up sampling requirements.

Cyanobacteria screening sample is to be collected biweekly from raw source water at sample point LT2001 unless requirements for reduced monitoring are met. Current reduced monitoring schedules can be found at http://epa.ohio.gov/ddogw/HAB.aspx. As of 12/31/17, all public water systems are responsible for contracting with a lab certified to perform cyanobacteria screening (qPCR). Please review the website for further information pertaining to follow-up sampling requirements for cyanobacteria screening gene detections, and certified labs that can perform analysis.

Where to Collect Samples For a Small Public Water System

Well → Pressure Tank → Treatment* → Raw Tap → EP00#

RS00# or LT200# or GWR00#

EP00# = First available tap after treatment*. Use for NITRATE and NITRITE samples
* If system does not have treatment, EP00# is the first tap after the well.

DS000 or SUP01

DS000 = Taps in Distribution System. Use for TOTAL COLIFORM (TCR) samples
SUP01 = Seasonal Startup Sample. Collected before serving water to the public.

Failing to sample for total coliform or nitrate will cost you $150 or more in penalties for each monitoring violation. A list of drinking water sample collection services that can assist you with collecting water samples is located at: [http://epa.ohio.gov/portals/28/documents/PWS/DWSample.pdf](http://epa.ohio.gov/portals/28/documents/PWS/DWSample.pdf).

### Where to Collect Samples For a Small Public Water System

- **Well**
- **Pressure Tank**
- **Treatment**
- **EP00#**
  - **DS000** or **SUP01**

**EP00#** = First available tap after treatment*.
Use for NITRATE and NITRITE samples

* If system does not have treatment, EP00# is the first tap after the well.

Failing to sample for total coliform or nitrate will cost you $150 or more in penalties for each monitoring violation. A list of drinking water sample collection services that can assist you with collecting water samples is located at: [http://epa.ohio.gov/portals/28/documents/PWS/DWSample.pdf](http://epa.ohio.gov/portals/28/documents/PWS/DWSample.pdf).
